

Retail and Food Services Point of Sale

A Point of Sale Solution for Retail and Food Service Management

Galaxy Retail and Food Point of Sale responds to more than just your ticketing needs - it also serves your retail and food service management needs. By utilizing the graphical interface in Galaxy Point of Sale, your staff can quickly and easily add items to a transaction through full color, graphical menus or by scanning a barcode. Modify retail and food items by size, color, or other attributes for simple menu selection. Collect valuable information to help grow your business using surveys and demographic data capture.

With Galaxy Retail and Food Point of Sale you can:

- **Keep Lines Short with Quick and Easy Checkout**
Galaxy's graphical interface lets you quickly and easily add items to a transaction through full color, simple-to-use graphical menus or by scanning a barcode.
- **Never Lose a Sale by Offering Flexible Payment Options**
Manually enter payments or scan credit cards or checks for immediate processing. Galaxy Point of Sale supports all your tendering needs, including integrated credit card processing.
- **Reduce Staff Training Time**
Your staff requires training on only one point of sale system. The system is easy to use and features user-defined point of sale menus.
- **Accurately Cash-out a Seller's Drawer**
Easily reconcile a seller's drawer at the end of the shift or day with *Denominational* and *Denominational by Form Of Payment* deposit methods.
- **Design Your System the Way You Want It**
Galaxy Point of Sale users control the database design of their system, including ticket and item configuration, the visual design of tickets, Galaxy menu design, and point of sale functions.

A Seamless Point of Sale System for Retail and Food Services

- Reduced training costs; your staff will require training on just one point of sale system
- Sales and discounting via a touch screen, keyboard, or barcode scan
- Based on industry-standard platforms, enabling smooth retrieval of data by third party software

Extensive Marketing and Demographic Data Collection Capabilities

- Promotion tracking
- Guest origins and surveying
- Prompt automatically at the beginning or end of transactions

Centralized Configuration

- All back office configurations are quickly applied across the entire system
- Control icons, fonts, colors and ticket function location on menus
- User-definable layouts for receipt printing
- Additional modules link into the Point of Sale system to make system administration easy

Powerful Management Reporting & Search Tools

- Retrieve data in over 100 reports filtered by cashier, booth, shift, location, and company
- Search and view transaction history for the entire site from Point of Sale
- Control security profiles for user access to Galaxy functions and maintenance tools

Advanced Cash Control Capabilities

- Accepts multiple forms of payment
- Processes multiple currencies in a single transaction
- Integrated credit, debit, and check authorization
- Electronic signature capture
- Full cash reconciliation processes
- Easy interim and final deposits
- Deposit reminders triggered by total cash sales in drawer
- Sales tracked by User or Shift
- Tracking across multiple agencies

Attach Multiple Peripherals to One Station

- Integrate ticket, promotion, and voucher barcode scanning at all POS stations
- Support multiple credit authorization peripherals, including magnetic card readers, signature capture devices and debit card pin pads
- Multiple customer display solutions including external booth displays
