Galaxy Ticketing Point of Sale
Reduce staff training and allow for faster sales transactions with user-defined point of sale menus.

Automated Ticket Printing
Automatically print user-defined tickets at the point of sale station. Include barcodes for admission into your facility and transaction-specific data for guest services.

Galaxy Ticketing Point of Sale responds to your growing needs for multiple sales channels, flexible and efficient guest services, and centralized management and security in a single system. The premier member of the Galaxy product family consolidates your ticketing, food, and retail sales through an easy-to-use point of sale interface. With Galaxy Ticketing POS, you can sell admission tickets, apply discounts, and collect demographic and revenue data. These features, combined with powerful reporting capabilities and cutting edge security, make Galaxy Ticketing POS the leader in the ticketing point of sale industry.

With Galaxy Ticketing Point of Sale you can:

- Never Lose a Sale by Offering Flexible Payment Options**
Manually enter payments or scan credit cards or checks for immediate processing. Galaxy Point of Sale supports all your tendering needs, including integrated credit card processing.
- Reduce Staff Training Time**
Your staff requires training on only one point of sale system. The system is easy to use and features user-defined point of sale menus.
- Accurately Cash-out a Seller's Drawer**
Easily reconcile a seller's drawer at the end of the shift or day with *Denominational* and *Denominational by Form Of Payment* deposit methods.
- Increase Sales by Collecting Valuable Customer Information**
Galaxy Point of Sale has extensive marketing and demographic data collection capabilities that you can use to grow your business.
- Design Your System the Way You Want It**
Galaxy Point of Sale users control the database design of their system, including ticket and item configuration, the visual design of tickets, Galaxy menu design, and point of sale functions.

Guided Cashout Procedures
 Accurately reconcile the seller's drawer at the end of the shift or day with Denominational and Denominational by Form Of Payment deposit methods.

Denominational Deposit By FOP

Deposit ID: C11198

Select the form of payment, then enter the amount of each denomination.

Intelligent Ticket Returns
 Make informed decisions by viewing history, usage and notes before returning, reprinting or upgrading tickets. Available fields are controlled by security privileges to protect sensitive information.

Single, Integrated Point of Sale System

- Reliable, flexible, and high-speed ticketing
- General admission, group, or date-specific ticket sales
- Reduced training costs; your staff will require training on just one point of sale system
- Sales and discounting via a touch screen, keyboard, or barcode scan
- Based on industry-standard platforms, enabling smooth retrieval of data by third party software

Automated Ticket Printing

- Automatically print user-defined tickets at the point of sale station
- Include barcodes for admission into your facility

Extensive Marketing and Demographic Data Collection Capabilities

- Promotion tracking
- Guest origins and surveying
- Prompt automatically at the beginning or end of transactions

Centralized Configuration

- All back office configurations are quickly applied across the entire system
- Control icons, fonts, colors and ticket function location on menus
- User-definable ticket layouts for ticket and receipt printing
- Additional modules link into the Point of Sale system to make system administration easy

Enhanced Management Reporting and Search Tools

- View ticket history and usage, return, and reprint tickets in single process
- Retrieve data in over 100 reports filtered by cashier, booth, shift, location, and company
- Search and view transaction history for the entire site from Point of Sale
- Control security profiles for user access to Galaxy functions and maintenance tools
- Simplified price rate management with Price Schedules

Advanced Cash Control Capabilities

- Accepts multiple forms of payment
- Processes multiple currencies in a single transaction
- Integrated credit, debit, and check authorization
- Electronic signature capture
- Full cash reconciliation processes, and easy interim and final deposits
- Deposit reminders triggered by total cash sales in drawer
- Sales tracked by User or Shift, and tracking across multiple agencies

Attach Multiple Peripherals to One Station

- Integrate ticket, promotion, and voucher barcode scanning at all POS stations
- Support multiple credit authorization peripherals, including magnetic card readers, signature capture devices and debit card pin pads
- Multiple customer display solutions including external booth displays
