# UGM SCHEDULE AT-A-GLANCE

UGM SCHEDULE  
AT-A-GLANCE

## **Asian Elephant**

From trunk to toe, Asia's largest land mammal displays some amazing adaptations to life as a forest-dwelling herbivore. It is most famous for its trunk, which is indispensable for feeding, drinking, smelling, touching, communicating and bathing. Asian elephants live in family groups called herds that are led by older, experienced females.

# EVENT MAP

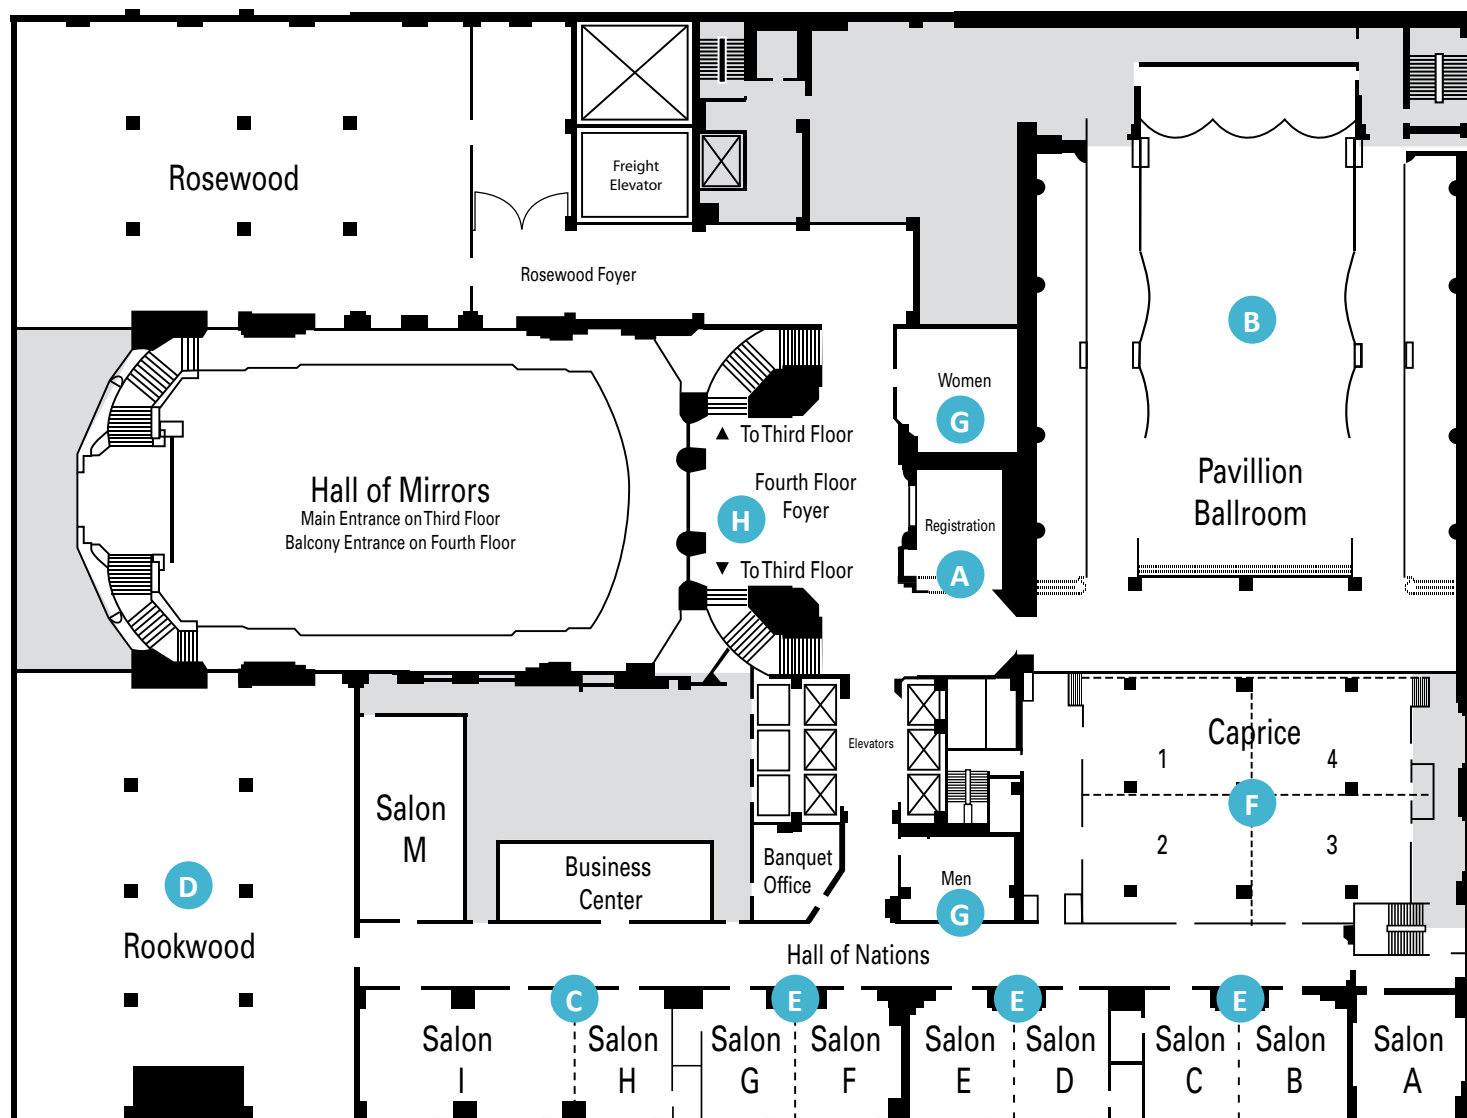

## **Fennec Fox**

The smallest fox, the fennec fox has the largest ears relative to body size of any canid, reaching lengths of up to six inches. In addition to enhancing the fox's sense of hearing, the huge ears also act as radiators, allowing it to regulate its body temperature in the hot desert.

# MEET THE PEOPLE

## **Green Basilisk**

A member of the iguana family, the green basilisk lizard spends most of its time in the trees and is never far from water. When faced with danger, the basilisk will drop from a tree into the water and sprint across the water's surface on specially designed feet to escape.

**PRESENTATION:**

How Shoreline Sightseeing Leverages Galaxy to Stay #1

# PRESENTATIONS

## **Hippopotamus**

Hippos spend the majority of the day soaking in water or mud to keep their skin moist and bodies cool. When submerged, just their eyes, ears and nostrils stick out of the water so they can still see, hear and smell what's going on around them. At night, they come out to munch on grass.

# Daily Themes and Funnel Activities Key

Each session, panel and breakout addresses key business activities and goals. To help you better understand how a topic at hand can influence your business, we've created this useful key and inserted the icons by each presentation in the agenda. Each day of UGM is centered around a theme. And within each day, presentations focus on one or more funnel activities that will help you reach your business goals.

## DAILY THEMES

### MEASURE

These sessions will help you determine what information you can be measuring, what tools you can use, and how you can interpret what you gather. Then, learn how to use all this information to determine what success looks like.

### EXPERIENCE

After these sessions, you will have a better idea of how you can deliver exceptional customer service to your guests with engaging experiences.

### SIMPLIFY

These sessions offer useful real-world information on how to take all your system practices and find efficiencies; how to take all your data and distill it into actionable takeaways that make your operation more efficient and easier to navigate for guests and team members.

### EDUCATE

In these sessions, discuss and learn best practices for communicating and implementing change with your team members and guests to create positive momentum.

### LEAD

In these sessions, learn how to stay on the cutting edge of technology and engagement trends and implement those at your attraction.

## FUNNEL ACTIVITIES

### ATTRACT

Topics discussed in these sessions will help you find and appeal to your target audiences.

### ENGAGE

Topics discussed in these sessions will help you keep your potential guests interested in your brand and move them closer to your end goal.

### HARVEST

Topics in these sessions will help you turn these potential customers into visiting guests.

### NURTURE

Topics in these sessions will help you transition these guests into repeat visitors: season pass-holders, members, donors, brand ambassadors, etc. You'll also learn how to use Attract, Engage and Harvest techniques to form a brand-positive relationship with these guests.

# CASE STUDY

## GALAXY® CERTIFICATION FOR A NEW SYSTEM ADMINISTRATOR

### THE CHALLENGE

Completing the on-boarding process of a new employee effectively is one of the biggest challenges a manager faces. This is amplified when that new hire is a Galaxy System Administrator, who needs to learn the company's business practices as well as how to apply them when configuring, maintaining and troubleshooting Galaxy. Finding the time to get a new hire up to speed in addition to doing your own job responsibilities can be a difficult task.

### THE SOLUTION

Managers at the Denver Museum of Nature & Science, the Cincinnati Zoo & Botanical Garden, and Wildlife Conservation Society faced this exact challenge. And they turned to the Galaxy Certification Program to take on-boarding their new team members in core Galaxy features off their plate.

Enrolling your new system administrator in this course provides the foundation of Galaxy knowledge necessary to be successful in their role. The program incorporates self-paced courses for independent learning in addition to guidance from a Galaxy certified instructor at Gateway. Candidates are provided with a training environment to complete industry related configuration scenarios, which allows for practice that does not impact your live operation. With successful results on the configuration-based exam at the end of the program, you can be assured that your system administrator can complete core configuration for a Galaxy-supported operation. We support continued learning with a one-year subscription to all self-paced courses offered from Gateway.

### CUSTOMER EXPERIENCE

When Ben Watson was hired at Denver Museum of Nature & Science as an Applications Administrator, Charlie King-Miller turned to the Galaxy Certification Program as the best way for him to learn Galaxy quickly. "Certification is no substitute for experience with the software, but it dramatically shortens the learning curve," says Charlie, Manager of Applications Administrators. "Ben was able to get up to speed on existing and new functionality so much faster than if I had trained him."

Jarrid Vaughn, Sr. Manager of Visitor Experience & FUN at Cincinnati Zoo, on-boarded Aaron McClay, a new system administrator, using the Galaxy Certification Program. "It definitely made bringing someone on board from the outside, with no experience, a lot easier," says Jarrid. "After completion of his training, Aaron was able to dive right in and begin working on his own to complete tasks and assist users throughout the Zoo."

While Brianna Quackenbush was not new to Wildlife Conservation Society, she was new to the world of configuration in Galaxy when she took the role of Galaxy System Administrator. Brianna completed the Galaxy Certification Program during her first few months. "This program gave me a really good knowledge base that lined up well with my onsite training as I transitioned into my new position," says Brianna. The program provided both immediate benefits, as well as assistance with more long-term goals and growth. "While some of the tasks in the program were not things we currently used, I was able to take those ideas to help improve and implement changes to our organization."

"Ben was able to get up to speed on existing and new functionality so much faster than if I had trained him."

# CASE STUDY

## GALAXY® CERTIFICATION PROGRAM FOR YOUR CURRENT SYSTEM ADMINISTRATOR

### THE CUSTOMER

West Edmonton Mall is a 5.3-million-square-foot entertainment complex. Alongside its stores and restaurants, there are nine attractions including an amusement park, waterpark and underground aquarium. For 23 years, the Mall has used Gateway Ticketing Systems' Galaxy software to run their attractions operations, making it imperative that the Mall employ a strong staff of system administrators.

### THE CHALLENGE

West Edmonton Mall would periodically upgrade to the latest version of Galaxy to access the software's new features and functions. However, the impact of these features on their guest experience depended on their system administrator's ability to successfully support them. "Even though I'm confident in my knowledge of Galaxy, I'm not confident that I know everything about every module that Galaxy has to offer," says David Lee, Senior Accountant at West Edmonton Mall.

### THEIR SOLUTION

David enrolled Breanne Allan, their current Galaxy System Administrator, into the Galaxy Certification Program. Throughout the program, Breanne learned best practices for base configuration in the core Galaxy modules and the eGalaxy Web Store. The program curriculum also included self-paced courses for independent learning in addition to guidance from a Galaxy certified instructor. She was provided with a training environment to complete industry-related configuration scenarios, which allowed for practice that did not impact live operation.

"Whether you are new to Galaxy or a seasoned pro, I highly recommend the Galaxy Certification Program to everyone," says Breanne. "You learn how to effectively configure and use the features of Galaxy by ACTUALLY doing it. You get one-on-one review periods of your configuration with the instructor so you can ask additional questions and get the answers you need."

With successful results on the configuration-based exam at the end of the program, managers are assured their system administrator can complete core configuration for a Galaxy-supported operation. We support continued learning with a one-year subscription to all self-paced courses offered from Gateway.

### THEIR BUSINESS BENEFITS

Even as an experienced system administrator, Breanne found the Galaxy Certification Program made her more confident and efficient with her job responsibilities. "The Galaxy Certification Program really helped to reaffirm the knowledge that I already had, provided me with a better understanding of WHY things needed to be configured in certain ways, and provided me with knowledge about Galaxy features and functions that I didn't even know were possible."

Since completing the Program, Breanne has become a go-to person when implementing new programs and offers at West Edmonton Mall. "Whenever someone asks, 'can this be done', Breanne is able to at least confirm if she's seen this exact thing or something similar during her program," David explains. "We are then able to review the features and collaborate on a solution." And as Breanne elaborates: "Being certified also helps you identify and report issues to Gateway Ticketing Systems in a manner that helps the Support Desk team understand your issues so they can be resolved quickly."

"The program is a great way to validate the user is up to date with all the newest features of the Galaxy system."

*David Lee  
Senior Accountant*

"The Galaxy Certification Program provides you with the knowledge and confidence to be able to use Galaxy to its full potential."

*Breanne Allan  
Galaxy System Administrator*

"I've been told it's not an easy course. That means only people that truly learn from the program will pass and be certified."

*David Lee  
Senior Accountant*

# CASE STUDY

## GALAXY CONNECT AND THE USS MIDWAY MUSEUM

### THE CUSTOMER

The USS Midway is the longest-serving American aircraft carrier of the 20th century. It was opened as the USS Midway Museum in June 2004, dedicated to preserving the memory of the people who served aboard the ship. The museum welcomes 1.4 million visitors annually, employs 200 paid staff plus 800 volunteers, and is currently the #5 Museum in America according to TripAdvisor. They have used Gateway Ticketing Systems' Galaxy® ticketing and admission control solutions since 2008.

### THE CHALLENGE

The USS Midway Museum was using a competitor offering to sell tickets through online travel agencies (OTAs). But their staff was spending hours reconciling vouchers every month because each distributor had different requirements. They also had no clear insight into the number of vouchers sold. So when a voucher was not redeemed, the distributor kept the profit. Additionally, the few cases of voucher fraud were difficult to prevent and initiated large customer service issues as guests could potentially use a single voucher without a barcode multiple times to redeem multiple tickets.

"We really wanted to connect to the wholesalers directly", says Cheryl Bailey, the System Administrator at the Midway, "But the wholesalers either weren't capable or weren't willing to build a custom API. We considered building these APIs in-house, but we didn't have the right technical knowledge or resources."

### THEIR SOLUTION

The USS Midway Museum worked with Gateway's Team to transition to our Galaxy Connect™ Platform. The platform connects suppliers to third-party distributors with just a single integration so they can issue live tickets and eliminate paper vouchers. Since Connect already had a growing list of distributor agreements, the Midway gained access to many of the OTAs they were already using, but this time through just one API.

### THEIR BUSINESS BENEFITS

"Connect has saved us 40-50 hours a month in reconciling vouchers, and we saw about a 20% bump in sales with our largest distributors when we started using the platform", says Joe Wagstaff, Sales Manager with the Midway.

The customer experience and guest satisfaction has improved as visitors now have their tickets before they arrive. They don't have to wait in line and can go right to security. Lines at the gate have cut in half giving the ticket staff more time to offer better customer service, and voucher fraud is now almost non-existent. Since there is clear reporting into the number of tickets sold, contracts are being renegotiated so the Midway profits when tickets sold through their partners aren't used.

But ultimately, as Cheryl puts it, "it just makes more sense to have one API with multiple people using it." It's simple to setup a new account since the API already exists, and the support from Gateway provides the technical expertise the museum doesn't have. "Connect has so much potential and we're excited to see what will roll out in the future."

Galaxy{connect}™

“

We really wanted to connect to the wholesalers directly, but the wholesalers either weren't capable or weren't willing to build a custom API.

*Cheryl Bailey  
System Administrator*

“

Connect has saved us 40-50 hours a month in reconciling vouchers, and we saw about a 20% bump in sales with our largest distributors.

# Beyond the Barcode

Gateway Ticketing Systems' Industry Newsletter

## When Designing Intuitive Venue Entrances, Look Outside the Attractions Space

Many visitors to our attractions across the world are not accustomed to the process of entering a venue. While this may sound ludicrous, the entrance process has become wildly complex. Tickets that are only valid on certain days, at a certain place, or require pre-printing and exchanging for another ticket, at a kiosk or a counter. Paper tickets, wristbands, membership cards, scan your phone, early entrance, special entrance, VIP entrance. For a guest that doesn't spend every day dealing with ticketing, these differences create friction.

Designing an intuitive entrance is key to eliminating this friction. And it's critical to ensure that the technology solutions you deploy make entering your venue as easy as possible. You need to leverage concepts, experiences and technology that your guests are already familiar with so they can quickly understand how to interact with the access control point and enter efficiently. For example....

➤ To read more, visit: [bit.ly/entrances](https://bit.ly/entrances)

## 10 Success Factors in Choosing the Right Ticketing System for Your Attraction

You've been charged with finding a new ticketing solution for your venue. Perhaps you've outgrown your original system or encountered too many barriers to success with your legacy software.

Obviously you want to succeed in finding the perfect match to meet your needs and take your business forward in the future. Between the major providers you already know and an ol' fashioned Google search, you'll start getting a sense of who you want to talk with.

But what are those invaluable tips that can make your evaluation process more efficient and help ensure you select the right partner? Download our eBook and read on for the gems we've uncovered in helping hundreds of the world's top attractions do just that.

➤ Download the full eBook: [bit.ly/tenfactors](http://bit.ly/tenfactors)

## Considering Kiosks? Answer These 14 Questions First

Over the last five years, inquiries from customers looking to deploy a kiosk at their location have increased noticeably. And it makes sense. Kiosks offer plenty of benefits for your attraction: reducing lines at your traditional POS, reducing the number of labor hours needed to sell tickets, improving branding and the customer experience. But that doesn't mean you should jump-in head first without first considering all your business objectives and needs. Before we move forward with any concrete discussions, I always ask our customers these 14 questions:

➤ Download the infographic: [bit.ly/kiosks14](http://bit.ly/kiosks14)

## Galaxy{connect}™ Increases Sales by 20%

One way more and more attractions are looking to increase revenue and attendance is by building relationships with third-party distributors (OTAs). But many of these distributors provide vouchers to your guests, meaning they have to stand in line at your gate to redeem it for a live ticket. Additionally, for each distributor you have a relationship with, you have to build a one-off integration which takes IT resources away from other important responsibilities.

Connect eliminates these challenges, enabling you to sell live tickets through any number of OTAs with just a single integration. In fact, in 2019 to-date, our customers using Galaxy Connect have sold \$130 million in tickets and over 1.3 million guests have skipped the redemption line and gotten into their venues quicker. The USS Midway Museum gave us their thoughts on how Galaxy Connect has improved their business.

## Explore the Galaxy® with Mike Marks

Mike Marks is a Gateway Ticketing Systems' Business Solutions Engineer. As he puts it simply: his role is assisting customers and potential customers in finding their way around Galaxy.

Every month, Mike explores with you the vast configuration options available in Galaxy and shows you how to streamline your process with tips and tricks through engaging and educational tutorial videos. If you're interested in seeing the Galaxy software in action...

➤ Watch the video tutorials: [bit.ly/ETGMM](https://bit.ly/ETGMM)

## Galaxy Users Turn to Galaxy Certification to On-board New System Admins and Stay on Top of New Releases

“ Whether you are new to Galaxy or a seasoned pro, I highly recommend the Galaxy Certification Program to everyone. You learn how to effectively configure and use the features of Galaxy by ACTUALLY doing it. You get one-on-one review periods of your configuration with the instructor so you can ask additional questions and get the answers you need.

— Breanne Allan —  
System Administrator | West Edmonton Mall

Completing an effective on-boarding process for your new Galaxy System Administrator is a tall order when they need to learn your company's business practices, as well as how to apply them to Galaxy. And even if you already manage a Galaxy System Admin, or already are one yourself, it's difficult to know everything about every module in the software, particularly when new versions are released.

Managers and system admins from Galaxy sites have discovered a solution to this challenge: Our Galaxy System Administrator Certification Course. The program incorporates self-paced courses for independent learning in addition to guidance from a Galaxy certified instructor at Gateway. Candidates are provided with a training environment to complete industry related configuration scenarios, which allows for practice that does not impact your live operation. With successful results on the configuration-based exam at the end of the program, you can be assured that your system administrator can complete core configuration for a Galaxy-supported operation.

But don't just take our word for it, see what real users who have benefitted from the program have to say:

## **Victorian Crowned Pigeon**

Nearly the size of a turkey, the Victoria crowned pigeon is the largest of all living pigeons. It wears a crown of tall, wispy feathers on top of its head. During courtship, the male bows to his queen, fans his feathers and calls to her with a deep whooping.

New account set up and pricing information:

Daniel Holman, Chase Merchant Services

Call 972.324.5572 or email [smb\\_partner\\_programs@chase.com](mailto:smb_partner_programs@chase.com)

Businesses are required to complete an application and agree to terms and conditions at the time of enrollment. All businesses are subject to credit approval. Merchant services are provided by Paymentech, LLC ("Chase"), a subsidiary of JPMorgan Chase Bank, N.A. <sup>1</sup>Certain restrictions may apply. Not all businesses may qualify for Month-to-month or No Long-Term Contract, such as businesses who: require processing capabilities in multiple currencies, process over \$5 million in annual credit/debit card sales or have certain software or connectivity requirements. Qualifying businesses may terminate their contract at any time by providing 30 days' written notice. Businesses who receive a promotional consideration from Chase may be required to repay all or a pro-rated portion of the value of such promotional consideration if the contract is terminated within the first 24 months. Businesses who do not qualify for the No Long-Term Contract may be subject to additional terms and conditions, including a defined initial term and early termination fees. Talk to a Chase Representative for more details. <sup>2</sup>Next business day funding is available to eligible Chase merchant services clients who deposit into a single Chase business checking account. Visa®, MasterCard®, and Discover® credit and debit transactions are eligible. All businesses are subject to business credit approval and all funds are subject to fraud monitoring. In addition, funding is subject to the terms and conditions of the merchant processing agreement. Chase must receive settled transactions by 10:00 pm EST (some businesses may qualify for a 11:59 pm ET settlement; talk to a Chase representative for more details). Funds are deposited on the next business day, excluding weekends and bank holidays. Some exclusions may apply. The listed payment brand(s) are not sponsors of this program. All marks are marks of their respective companies. ©2019 JPMorgan Chase & Co. All rights reserved.
